

RHS SPRING FLOWER SHOW – CARDIFF 20-22 April 2007

THE INSCAPE GARDEN

Sponsored by **INTURF WALES**

Designed by **Jo Penn – Jo gardens**

The **Inscape Garden** offers a tranquil garden space that could be created within the boundaries of a typical suburban back garden in Cardiff.

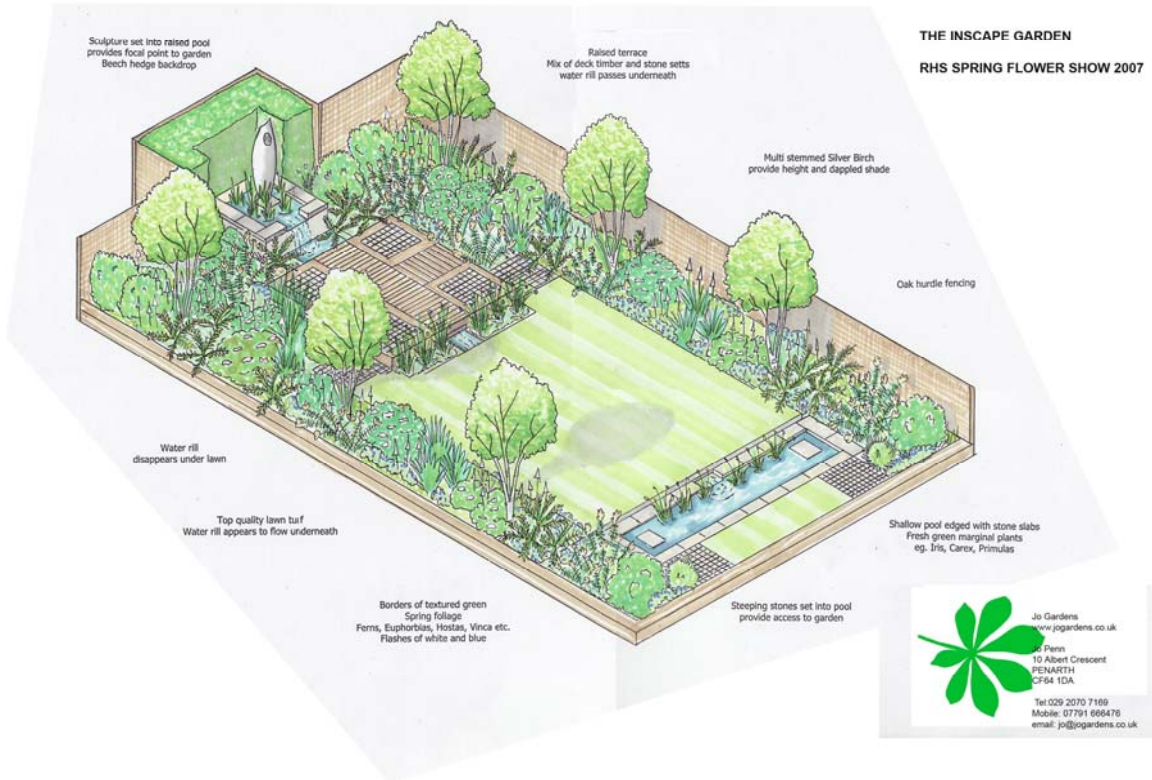

It aims to show what could be achieved without costing the earth; with limited hard landscaping and the emphasis on the plants, the **Inscape Garden** offers an abundant and attractive habitat for wildlife, whilst being economical to build. All the plants and materials can easily be sourced locally.

The formal layout of the Inscape Garden is softened by the loose informal nature of the planting. Central to the garden is the lawn, which offers a sense of space, and a soft foil to the early flowering perennials set within the borders. To the edge of the lawn are six silver birch trees, which give height and form a light canopy over the whole garden.

A series of inter-connecting water features links the garden together; a shallow water rill is fed from the raised pool and appears to flow under the terrace then under the lawn before re-emerging as it falls into the shallow pool at the front of the garden.

The garden is enclosed on two sides by bespoke oak hurdle fencing, providing privacy and shelter to the garden and also a stylish backdrop to the array of green, textured foliage plants.
